

Calf Colostrum Double Strength

Calf needs extra colostrum support after a difficult birth?

Job done with Nettex Double Strength Calf Colostrum

Concentrated high protein, UK full fat colostrum supplement to give calves a strong start.

Product Features	Benefits
High Levels of Egg Protein	• Concentrated high protein supports performance • Quality easily digested protein
Highly Digestible Energy Source	• Rapid improvement in energy status • Increases plasma glucose • Decreases plasma non esterified fatty acids • Maintain body temperature and prevent hypothermia
Bovine Proteins from dried Bovine Colostrum	• Help support immune development • Help support natural defences
Easy Mixing	• Smooth consistent product • Easy feeding via both bottle and stomach tube
Vitamins A,D & E (Immune supporting vitamins)	• Support vitamin levels in the new-born calf • Powerful antioxidant activity • Help support immune response

Regular use of a concentrated supplement such as Nettex Double Strength can support calf performance when calves are not receiving sufficient good quality maternal colostrum.

- Convenient and easy to use
- UK full fat colostrum
- EBL & TB Free

The first few hours of a calf's life are challenging

Time is critical

- The ability to absorb Ig's drops quickly and it's gone completely by 24 hours
- Energy is urgently required to get the calf up and feeding

Immunoglobulins are a key part of the immune system and crucial to protect the calf from common diseases such as scour and pneumonia.

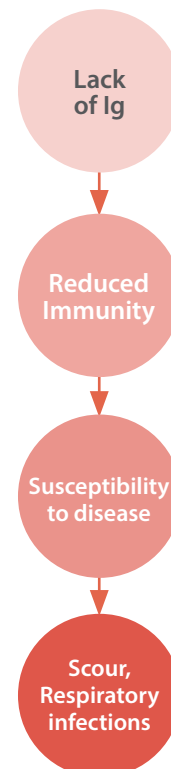

High levels of fat provide instant energy to keep the calf warm and get it standing and sucking.

Maternal colostrum contains
Immunoglobulins (Ig's)
High levels of fat
Minerals and Vitamins
Hormones and Growth factors

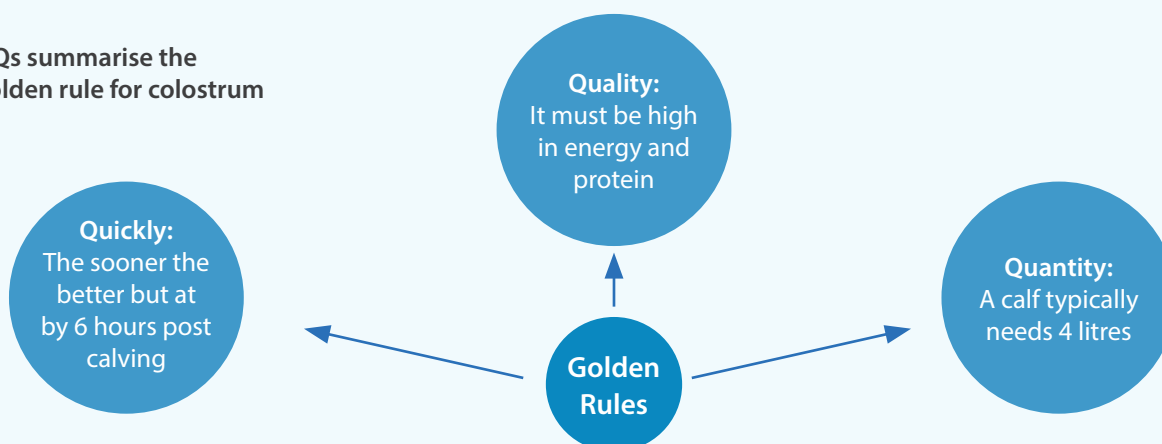

A calf receiving the cow's own colostrum is best, but there are many situations when this is not possible.

- Cow's colostrum poor quality
- Cow doesn't produce enough for lambs
- Cow too weak to suck

It's essential to have a supply of high-quality colostrum supplement available 24 hours a day for immediate use when required.

3 Qs summarise the golden rule for colostrum
