

Lamb Colostrum range

Nettex Lamb Colostrum range provides a solution for every situation

Ultra Concentrate:

- High Quality and mimics ewe's own colostrum
- Provides energy and support to weak and small lambs
- Contains CELMANAX™ with Prebiotic activity to support healthy gut colonisation

Lamb Colostrum:

- Formulated with energy protein and probiotics
- Supports health and growth
- All Nettex colostrums are made from natural, full fat colostrum
- Sourced exclusively from TB & EBL free UK herds
- Highly complementary to UK farm environments

All Nettex Colostrums contain

Coconut oil	• Highly Digestible Energy Source • Rapid improvement in energy status • Maintain body temperature
Bovine Protein	• Help support immune development • Help support natural defences
Egg Protein	• A high quality, digestible protein source
Vitamins A, D & E	• Support vitamin levels in the new-born lamb • Powerful antioxidant activity • Help support immune response

In addition: Nettex Ultra Concentrate contains ewe's milk to ensure a composition closer to ewe colostrum

Nettex Lamb Colostrum range:

- **Ultra Concentrate** mimics the ewe's own colostrum in every way possible ideal when insufficient maternal colostrum is available
- **Lamb Colostrum** formulated for new-born lambs to provide nutritional, energy and health support

Easy feeding: bottle or stomach tube	✓
Easy Mixing	✓
Smooth & consistent	✓

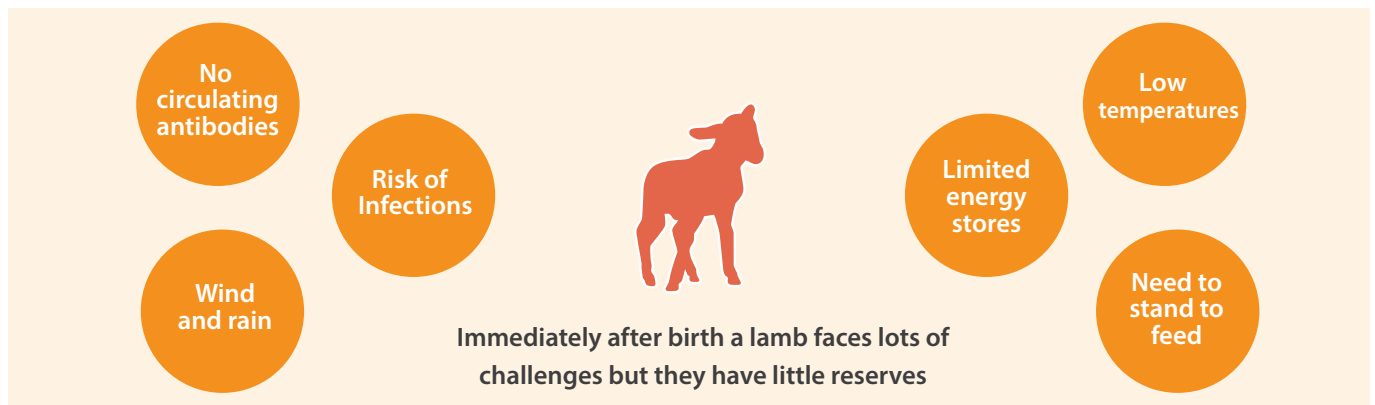

Feeding Instructions

Mix 25g with 80ml warm water and mix to smooth, creamy consistency
Feed as soon as possible after birth and ideally within first 2 hours
Repeat as necessary

Our expert products are here for your lambing prep, planning and performance.

Maternal colostrum is nature's solution to this challenge

A highly complex and concentrated resource specifically designed to help the lamb survive through its first few days and beyond

Maternal colostrum contains
Immunoglobulins (Ig's)
High levels of fat
Minerals and Vitamins
Hormones and Growth factors

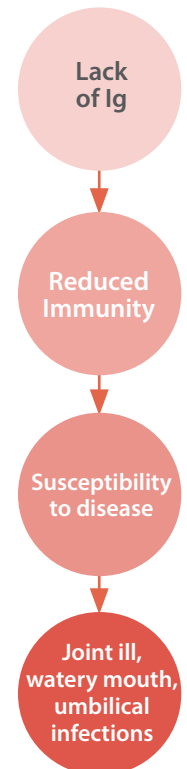

A lamb receiving the ewe's own colostrum is best but there are many situations when this is not possible

- Ewe's colostrum poor quality
- Ewe doesn't produce enough for lambs
- Lamb too weak to suck

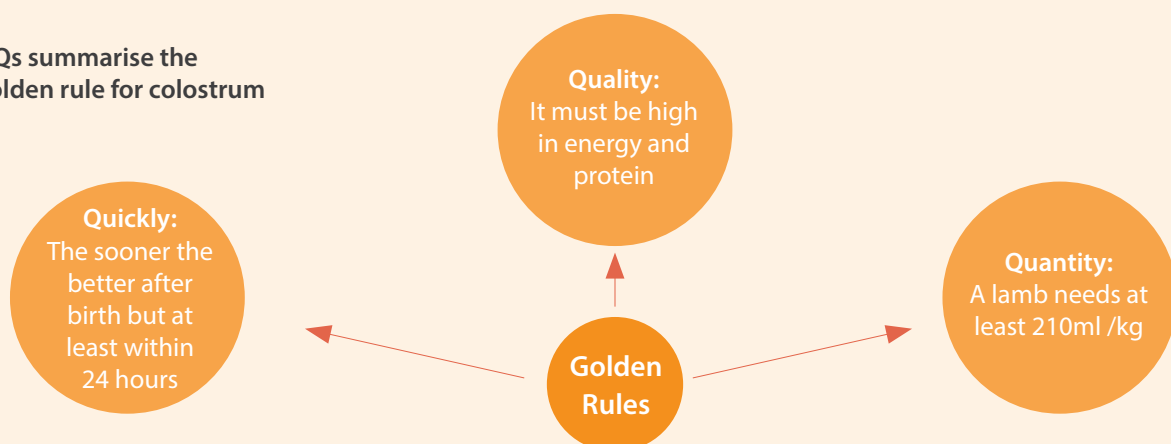

It's essential to have a supply of high-quality colostrum supplement available 24 hours a day for immediate use when required

Time is critical

The ability to absorb Ig's drops quickly and it's gone completely by 24 hours Energy is urgently required to get the lamb up, feeding and fighting hypothermia

3 Qs summarise the golden rule for colostrum

Our expert products are here for your lambing prep, planning and performance.
